An important route commuters use from Midtown to downtown is by way of Brazos Street, so it’s imperative that this roadway is as safe and accommodating to motorists, pedestrians and others in transit as possible. The Brazos Street Reconstruction Project includes reconstruction from Elgin to St. Joseph and will complement the award winning Bagby Street Greenroads Project.

The Brazos Street Reconstruction Project includes concrete pavement, public utility upgrades (water, storm, sanitary), enhanced intersections, wider sidewalks, landscaping, street furniture, brick pavers, accessibility ramps, and other pedestrian-related infrastructure. The project provides an enhanced pedestrian environment and an improved vehicular connection for northbound traffic through Midtown.

The objective behind making these enhancements is to improve the standard of living for people who work and live in the area and make for a more pleasant commute for those in transit.
