

MAIN STREET ENHANCEMENT PROJECT

HOUSTON, TEXAS

The Main Street Enhancement Project focuses on safety, aesthetics, environmental considerations and connectivity. Residents, business owners, visitors and tourists will benefit from the upgrades made to area, which is an important site for transit between NRG Stadium and downtown.

More lighting and widened sidewalks are just a couple of enhancements on this project. From an aesthetics standpoint, new landscaping and street furniture will accentuate the modern look and feel of the area, encouraging merchants to set up businesses in the area, and welcoming residents to look to Midtown for their new home. The project will also encourage nearby private development.
